## Candidates debate on issues, opponents' records

Mustang Daily—Jim Walker

San Luis Obispo County Supervisor Kurt Kupper at an earlier debate with Eric Seastrand. Kupper is running against Seastrand for the 29th Assembly District seat vacated by Carol Hallet in her bid for lieutenant governor.

by Phebe Fletcher  
Staff Writer

Five candidates seeking three offices in the Nov. 2 election participated in a debate forum Wednesday night at Cal Poly.

The candidates were Roger Bishop and Paul Floyd for County Auditor; Bill Coy and Mike Nolan for County Supervisor; and Kurt Kupper for 29th District Assembly. Kupper's opponent, Eric Seastrand cancelled.

One of the closest races is for county auditor. Roger Bishop emerged with a one percent lead ahead of his opponent, Paul Floyd in the primary.

Bishop, the first to speak, offered his professional skills as a certified public accountant to the county for what he said were "the essentially management problems in the county office."

Bishop accused his opponent Paul Floyd and current auditor Fred Cusick, who is retiring, of not reconciling the discrepancy between the auditing and engineering departments' total cost for the construction of the new county courthouse. "If there's been any reconciliation, it hasn't been made public. The taxpayers still do not know how much the courthouse cost them," Bishop said.

Criticizing the unexpected 3.4 million surplus in funds last year, Bishop said, "the auditor should have a plan for the use of surplus county funds," adding there would be another, larger surplus this year planned with the expectation that state funds will continue to dry up. "The funds should not be left just lying in contingency reserves," he said.

Paul Floyd, countered Bishop's professional claims and defended his management degree from UCLA, "where you can't major in accounting," he said.

He emphasized his experience, saying he has had a "broad exposure" working in several large counties. He was responsible for preparing the budget in Santa Barbara county, he said, and "thoroughly understands the wide spectrum of local services which the county offers."

Proposition 13 "forced county government to become more cost-effective," he said. "Before, if the county wanted to increase services, you paid the bill in higher taxes. It's healthy the people enacted this," he said.

Floyd warned the audience of the "split roll" tax which would assess county business on pre-proposition 13 guidelines, and leave property owners assessed as they are now.

The lower quality of California schools is due to tax monies going to the state and "not much returns back to the local level," he said.

Candidates Bill Coy and Mike Nolan both recognize the need for road repair, improvements in the Diablo Canyon evacuation plan, solutions to water problems, and hunting limitations in the areas of Morro Bay.

Coy emphasized his 20 years of business experience with J.C. Penney's multi-million dollar budget. He said, "the county possibly faces a reduction in AB-8 and revenue sharing funds. We've been relying on these, and I'm concerned."

Nolan said oil drilling would cause a lot of pollution problems in the ocean and air, and for the fishing industry.

"The Coastal Commission deserves some credit for being the only ones doing any sort of work on the county coastal plan," he said.

The current board has removed itself from any role and given negotiations over to the Hearst Corporation which is trying to win approval for development of its land in San Simeon.

Coy said the plan includes two golf courses which are to be maintained with fresh water. He said, "I wouldn't have any problems with one course, using reclaimed water."

Nolan added the Hearst representative is claiming the corporation will voluntarily cut back its water use in a drought so ranchers won't be hurt, but he said he doesn't believe "they will pull the plug on their water supply and let their courses turn brown as suggested."

Following the four other speakers, Kurt Kupper addressed the group of voters. "I will go on for 45 minutes without a break, and there will be no questions," he said.

Kupper filled in the audience on his past political record. He said he succeeded in his past three elections with a promise to work full-time at the position. "I am perhaps the first in history to live on the salary," he said.

"I didn't promise my wife happiness, only a full and interesting life," the candidate said, "and I promise the same to whoever wins the election," he added.

## Cogeneration fuels energy speculation for future

by Katie Sowle  
Staff Writer

If cogeneration is not the answer to energy problems, it is a viable aspect in energy production for reasons of conservation and environmental control, a consulting engineer said Oct. 28.

Charles Butler, a consulting engineer with the Brown and Root corporation spoke last week to an audience of about 40 students and faculty. The presentation was sponsored by the Cal Poly Electric Power Institute.

Butler explained cogeneration as "the sequential production of heat, steam or other useful energy from the same source." In other words, energy that is presently being lost in some engine systems in the form of excess heat or steam, can be reclaimed and put to use.

"The goal of cogeneration is to get the maximum utilization from a fuel source, and to increase the competitive advantage of a utility company," said Butler.

Cogeneration can improve any fuel output of the ma-

jor sources of natural gas, oil, petroleum, and coal, he added.

Another fuel type is biomass, and considering Poly, Butler wondered if maybe some enterprising person might not "train the cows to do their business in one spot and then collect it. That would put some great biomass back in the system."

Using graphs and diagrams to illustrate his statements, Butler explained that in most energy producing systems, the efficiency is about 75 to 85 percent. But with cogeneration, it jumps to 98 percent.

Butler covered some specific engines; one in particular was a gas turbine. He showed how the wasted exhaust goes into a recovery boiler, and then to a steam turbine. This energy can be used for drying or for the heating of rooms and offices, Butler added.

For the process to be cost effective, Butler said the usable waste heat must be "greater than 5 percent." If it is less than this, the additional cogeneration equipment would use more energy than it recovered. Cogeneration has been around for a number of years, Butler said, ever since the oil crises of the 1970s.

"People didn't want to be dependent on foreign oil, and the utilities have to make a profit on their product," said Butler.

So to decrease needed fuel, and increase profit, industries have turned to cogeneration. Butler said Brown and Root gets contracts from paper, food, oil, and lumber companies, in addition to private and public institutions who want the extra equipment attached to their systems.

"We have to emphasize to some people that it's the same fuel source being used, and not just more independent components added on to a system," said Butler.

With 30 to 40 percent more heat recovery, benefits to the environment, and a reliable source of energy, Brown and Root believes cogeneration to be especially suited for California.

The state and federal government has put strong regulations on utilities, and Butler said cogeneration will among other things, help reduce emissions and assist in air quality monitoring. With fuel getting even scarcer and costs higher, Butler sees no lack of business for Brown and Root in the near future.

## Soil team blows into Fresno

by Lisa Shidler  
Staff Writer

Cal Poly's soil judging teams will travel Wednesday to the Western Regional Soil Judging Competition at Fresno State University.

Poly's first and second teams accompanied by assistant coach Tom Rice, will practice judging Wednesday and Thursday before the competition is held on Friday. Eight schools from four states will vie for the top two places, which will go on to the national competition at the University in April.

The competition involves describing a

soil and making judgments on the best use and management of the soil according to Rice. The teams have been practicing every Saturday for a month in preparation of the contest.

San Luis Obispo county is a unique outdoor lab for the teams' practices because a wide range of climate and parent material of soil is represented in the county, said Rice. This allows the students to visit many types of soil.

Rice believes the team members are very well trained and should be able to win the competition. Last year, the team won the regional competition but could not attend the nationals.

## Two Poly students arrested

Two Cal Poly students were arrested over the weekend and charged with misdemeanor offenses.

Christopher Harold DeLong is suspected in the theft of several motorcycle parts from a motorcycle belonging to another student, Rick Haynes.

Haynes reported the missing parts to Cal Poly public safety on Oct. 11. He then spotted the parts on a motorcycle on campus belonging to DeLong and notified police.

The motorcycle was released

with notice to appear for the misdemeanor charge of theft.

An 18-year-old computer science major was arrested Friday night, for disturbing the peace after he created an altercation at a dance at Fremont residence hall.

Gregory T. Martinez entered the area where the dance was in progress and began fighting and pushing people around. When he refused to stop, Fremont Resident Director Ann Clendenen made a citizen's arrest and turned him over to Cal Poly police.

## Roomers

by Henry Yasul

## Five office hopefuls speak to Cal Poly audience

From page 1

Growing more serious, Kupper said "only two to five percent of the issues are really under local control; the state is supporting us," and wielding the control, he said. "I will tell them how they really should be treating local

government," he added.

Giving an example, Kupper said he and several others filed suit against the federal government on the oil leasing issue and that he found a way to finance the appeal, which eventually won.

"Air quality is deteriorating rapidly here," Kupper said, adding "if it continues, we will start inspecting automobiles."

Kupper is not going to "to wait for the Easter Bunny to come around

again— we need new monies," for the deteriorating public education in the state, he said. Advocating secure, long-term funding for public schools, Kupper said he believes levying an oil severance tax could be a

solution. California is the only oil-producing state without the tax, which raises an average of \$450 million.

Kupper pointed out Seastrand's habit of verbalizing against oil drilling during campaigns, and

then never doing anything about it. The reason, Kupper explained, is found in the list of his major contributors, which include Chevron and Bechtel.

In contrast, "85 percent of (Kupper's) donations have come from within the district," he said.

"Because the area tends to be a dumping ground for the state, we can't afford someone who is inexperienced," Kupper said, citing the juvenile hall and California Men's Colony.

"In the last election, voting was down to 15 percent of the county that could vote," said Kupper, warning that such low voting rates leave the district vulnerable to reactionary patterns that are "very dangerous," the candidate concluded.

## Correction

The public lecture to be given by award-winning architect Rob Wellington Quigley at Cal Poly tonight at 8 p.m. will have an admission cost of \$1. The press release the *Mustang Daily* received stated the lecture was free. We regret this misinformation.

The lecture, which deals with Quigley's recent ideas and design activities will be presented in the Gallery (Room 105) of the university's Architecture and Environmental Design Building.

## Live from New York, it's 'Sophisticated Ladies'

Cal Poly, here's your chance for some real, live culture from one of America's most sophisticated cities.

Beamed live—via satellite from the Lunt Fontanne Theatre in New York—the long-running Broadway hit "Sophisticated Ladies" will be projected onto a 500 square foot screen in the main gym Friday.

A musical tribute to big band legend Duke Ellington, the show has been getting rave reviews since opening in March, 1981. Curtain time is 6:30 p.m. (9:30 in New York) and doors open at 5:45.

Tickets are \$6 (students), \$8 (Cal Poly faculty and staff) and \$10 (public). Tickets are on sale at Cheap Thrills and Boo Boo record stores in San Luis Obispo, or at the door.

A matinee of the same show in New York costs \$37.50.

The production is a cooperative effort of newly-formed Campus Entertainment Network and the ASI Program Board.

CEN will bring an earth station satellite dish the day before the show, fine tune the transmission and hang a 25 by 20 foot beamed theatre screen. Simultaneously, the live

show will be shown at other colleges across the nation. This is the first time ever a Broadway show will be telecast live during its current run.

"Sophisticated Ladies" features Gregory Hines portraying Ellington, who became a star after appearing in the original 1981 production.

Duke Ellington's son Mercer will conduct his father's orchestra in the show's tribute to the Duke, which included more than 40 songs.

Featured are Ellington's signature tune, "Take the A Train," "Satin Doll," "It Don't Mean a Thing,"

"Sophisticated Lady," "I Got it Bad," "Mood Indigo," "In a Sentimental Mood" and other classic standards from the Ellington catalog.

The show has been playing to sold-out, standing room only audiences since its opening, and was nominated for eight Tony

awards, the theatre equivalent of the Oscar.

Last year, the show was awarded two Tonys, one for best costume, and the other to Hinton Battle for the best featured actor in a musical.

The huge cast transforms Ellington's melodies into a spirited,

colorful romp with dancing, singing and sharp patter. The sets, mostly neon signs hung in space, portray the Duke's music in low-down dives and suave supper clubs.

As Duke himself put it, "It don't mean a thing if it ain't got that swing!"

## Los Folkloristas to play African and Latin music

Authentic music of South America and the Caribbean featuring seven musicians and some 80 native instruments, will be played by Los Folkloristas on Thursday, Nov. 4, at 8 p.m.

At Chumash Auditorium, this unusual musical event is open to the public.

Students tickets are \$3 advance at the University Union Ticket Office and \$5 at the door. Public tickets, \$4 in advance, are on sale at all Cheap Thrills stores and Boo Boo Records in San Luis Obispo. Door prices are \$6.

Los Folkloristas, formed in 1966, is based in Mexico City. They specialize in the music of all Latin America. Their repertoire includes the folk rhythms and chants of Mexico, Puerto Rico, Panama, Haiti, Peru, Colombia, Brazil, Venezuela, Cuba, Argentina, Chile, Bolivia, and Ecuador.

The group has mastered the indigenous music of Mexico and the Andean countries as well as the Afro-Latin American music of the Caribbean and Brazil, and the Nueva Cancion (or new song).

The instrumentation ranges from pre-Columbia Indian Instruments to the modern guitar and violin.

Los Folkloristas has performed in concert all over the world to more than 1,000 audiences.

The group has recorded albums in Mexico, France, Argentina, Germany, Brazil, Spain, Peru, and Italy on a variety of international labels.

At 11 a.m. on Nov. 4, Los Folkloristas will present a free bilingual musical workshop in the Plaza of the University Union. The public is invited to attend and participate in the workshop.

This musical event is cooperatively presented by the Fine Arts Committee and Multicultural Committee of the ASI, and Student Academic Services of the Student Affairs Division of Cal Poly.

Title painting "The Place Where I Came From," by featured Galerie artist Marian Stevens.

## Mixed media artist solos at the Galerie

Local artist Marian Stevens who uses oils, enamel, oil crayon and china marker, will display her works at the University Union Galerie from Nov. 7 through Dec. 3.

An opening reception to honor the artist will be held in the Galerie beginning at 7 p.m. Sunday, Nov. 7. Admission is free and refreshments will be served. The title of Stevens' mixed media show is "The Place Where I Come From."

Ms. Stevens was born in Houston and grew up in the suburbs of Chicago. She taught in the Denver area before joining the Cuesta Faculty.

Her paintings are at Cal Poly courtesy of the

Robert Pyle Gallery of Morro Bay.

As the title painting suggests, the exhibit consists primarily of autobiographical works. She writes, "the works began like altar pieces with vertical and horizontal lines symbolizing levels of reality—either human supplication or divine intervention. In this sense, the composition itself is part of the meaning of each picture, which is also true of altar pieces."

Galerie hours are Monday through Thursday, 10 a.m. to 6 p.m.; Friday, 10 a.m. to 2 p.m., and weekends noon to 4 p.m.

"The Place Where I Come From" is a presentation of the ASI Fine Arts Committee.

## Poly Athletes of the Week Two emerge as outstanding from a Poly Fabulous Four.

This was tough. Eenie meenie minie moe just wouldn't have done it.

Ordinarily after a week of Mustangs sports, two athletes emerge as from a magician's deck of cards as outstanding, conveniently male and female. Then there's this week, when from out of the deck came four aces.

Oh, boy, this was tough for the *Mustang Daily* sports staff to pick two.

There was senior outside

linebacker Jerry Schmidt, a protagonist among the newly-dubbed Sack Men, who Saturday night against Santa Clara University proved the worth of this tackle with six solo quarterback sacks and one assisted sack, literally choking the Broncos' offense for a 20-3 win.

Jennifer Dunn came up also, the sophomore cross country runner who, running in relative obscurity at the Stanford and Cal Poly

invitationals, made herself known when it counted. Dunn finished third Saturday in a photo finish at the recent feat, and probably most important to date, was at the NCAA Regionals, where she broke the UC Riverside course record with 16:28. She broke the Riverside course record four weeks ago. That's almost 30 seconds faster than when she broke the Riverside course record for weeks ago with 16:57.

Please see page 7

The discoveries continue...

# Hughes Story

**Today Hughes Aircraft  
Company is creating a  
new world with electronics.**

**In 1947** a man flew the Flying Boat, "Hercules" — the largest airplane in the world.

The man was Howard Robard Hughes.

His ingenious ideas and explorations brought new discoveries in aerodynamics, communications, avionics, electronics.

And the early years of Hughes Aircraft Company.

**Today, Hughes no longer builds airplanes** but the discoveries and exploration of ideas continue.

The company's long history of technological firsts, including the first working laser, first 3-D radar, and first synchronous-orbit spacecraft, position Hughes as a world leader in today's electronics industry. If your degree is in:

- Electrical Mechanical, Manufacturing, or Industrial Engineering
- Materials
- Computer Science
- Physics
- Industrial/Electronic Technology

## Intramurals schedule

### Football

Thursday, November 4th

3:10 p.m. I Don't Know - ASAF Founders  
4:10 p.m. Sweet Release - Heat Seeking Miss  
4:30 p.m.

Saturday, November 6th

9:00 a.m. Slap Attack - Brawlers  
9:50 a.m. 69'ERS - Heat S. Missiles  
10:40 a.m. Blazers - Trop Flying Tigers  
11:30 a.m. Sweet Release - I Don't Know  
1:10 p.m. Slomotion - Fleaflickers  
2:00 p.m. St Elmos Fire - Bulldogs  
2:50 p.m. Awesome - ...Older Women  
3:40 p.m. No Name - TKB

### Basketball

Thursday, November 4th  
Court 1

8:00 a.m. Beginners Luck vs Used to be Good  
8:45 a.m. Gold no Bronze vs Beginners Luck

Court 2

8:00 a.m. Gold no Bronze vs SLO Lakers  
8:00 a.m. Rhapsody vs Used to be Good

Saturday, November 6th

Court 1

9:00 a.m.  
9:45 a.m. Smith's "Boys" vs Zero's  
10:20 a.m. Puppies vs Niners  
11:15 a.m. Trinity Tigers vs White Shadows  
12:00 a.m. Dogs vs Condor  
12:45 White Shadows vs Grand Ave Bombers

Court 2

9:00 a.m.  
9:45 a.m. Gold no Bronze vs Purple Gang  
10:20 a.m. Flying Circus vs 69ers

## Cross Country provides top performers for week

Carmelo Rios

Amy Harper

From page 6

NCAA Region VII Cross Country Qualifying Meet. Her time, 16:47, just behind UC Davis' Patti Gray.

Oh, a toughie.

But the women's athlete of the week this time is the person behind which Dunn finished—Amy Harper.

The junior has this habit of shattering things, like course records. Her most

In between that time she shattered the Poly course record at the Cal Poly invitational with 16:45, a clear indication of improvement, if you can do that

with near-perfection.

Harper shattered yet another, untouchable record—the first *Mustang Daily* athlete of the week.

For the men, it was a win-won-for-the-Gipper story that won the sports staff's final vote in picking Carmelo Rios. Illness allowed the senior to take part in only three meets this season, the Riverside Invitational to open the season, the Cal Poly Invitational, and the NCAA Regionals.

As for his performance in the latter, you couldn't even tell he was under the weather. Rios won the

10,000 meter race in 30:02, the third fastest time on the UC Riverside course and the fastest in any regional race at Riverside and 50 seconds faster than Rios ran a Riverside four weeks ago.

Congratulations to the athletes of the week, and to all the athletes as they near the end of their seasons—make it even harder for the sports staff to choose who goes in this space.

## Vote for your choice

And now...the moment you've been waiting for....

After months of campaigns with back-stabbing, suggestive innuendos, name-calling, misleading propaganda and downright lies, Election Day '82 is here.

It hasn't been a friendly trail, to say the least. Each percentage point gained in the polls by one candidate over another set off a flurry of finger-pointing to his or her income status, relationships with other undesirables, mode of transportation, even sexual preference—all having absolutely nothing to do with one's ability to perform well in the public's interest.

The same thing occurred with the 15 propositions, particularly 11, 12 and 15. A myriad of statistics has accumulated on both sides of these controversial statements regarding minimum deposit of 5 cents on cans and bottles, a freeze on nuclear arms and gun control in California.

In addition, the incredible amount of money spent by some interests seems to warrant a need to limit funds spent in political campaigns.

But in spite of all the mudslinging and fortunes spent to promote special interests, it is still our duty to vote. It is difficult, whether one is liberal or conservative, Democrat or Republican, to sort through the thick fog of political rhetoric and find desirable candidates and worthwhile propositions. All of the issues however, will have some bearing on our lives, and thus deserve careful and unbiased scrutiny. The elected officials as well will affect the political future of the state, and thus voters must try to put name-calling by the wayside and look at the candidates' stances on important issues.

The Mustang Daily Editorial Board recognizes that this has been a brutal campaign, a bloodthirsty crawl to gain the lead at any expense. The behavior of some candidates has been enough to discredit everyone running for office. Some of the hogwash that has circulated regarding bizarre effects propositions would have if passed is enough to make your hair curl.

But again, it is our duty as citizens to bypass the rhetoric and study issues and candidates carefully, and above all, vote. The future is in our hands, let's not leave the decision-making to others. Today is Election Day. Don't forget to vote.

## Letters

### Resistors eat quiche

Editor:

In recent weeks it has been brought to the attention of many students that the Mustang Daily (or the Communist Manifesto as it is known by others) has shown favoritism toward draft resistance. Why should the school paper be aiding the undermining of the integrity of the United States of America? It's time that someone else voiced the opinion of the 94 percent who have registered.

First of all, registration doesn't mean there will be draft. For you losers out there who haven't registered you should consider yourselves lucky that registration is all that is asked of you. In most of the civilized countries of the world, service in the military is mandatory. Secondly, if you are sincere in your beliefs about the draft you can abstain from active duty as a conscientious objector. This would allow for someone else to protect the country in your place. Protesting or fighting the issue is ut-

ter stupidity. The military is not going to start a draft now because they already have too many people trying to get in. The only reason former President Carter instated draft registration was that it would save this country 45 days in mobilization time. In that time the government could start turning out new recruits to back up those men already in service with this country in the event of a war. I suppose the draft resistors would rather have those men already in service die waiting for re-enforcements if the day ever came that there was a major war.

With the memories of Vietnam still fresh in the minds of many Americans it would not be conducive to the popularity of the government to start an unpopular or unnecessary war. So here's to the draft registration resistors: if you can find a better country than this one, go to it—if they'll take you. If not, quit your bitching.

A Real American,  
Kevin W. Buchanan

## Letters

### Working for defense

Editor:

Many students are presently applying to defense firms and I feel compelled to address two aspects of their decision. First off, the obvious thing they should consider is that they are supporting excessive spending on defense. By becoming just another employee, they are stating they feel it is right to multiply the world-destroying capability of the United States. They should be aware that the construction of these modern-day pyramids means the diversion of money from other problems such as world hunger. That is the cost of over-stocking of arms.

Secondly, the U.S. is now discovering that its exorbitant standard of living must decrease. For this reason, many firms and people who are directly in-

volved with the free enterprise portion of our society are learning to tighten their belts. Defense companies, however, are financed by the government and thus are part of the planned portion of our economy. For this reason they are not nearly as affected by these cutbacks especially with the present administration. History has shown that construction of pyramid-type objects leads to increased inflation and unemployment. If you wish to be a part of this undermining of the U.S. economy, by all means apply. My feelings however, are best stated in the bumper sticker which reads "EXCESSIVE DEFENSE SPENDING: Welfare for the Upper Middle Class."

Tom Culhane

### Denial of the individual

Editor:

Alas, an education devoid of adequate exposure to the Humanities plagues most students at Cal Poly and evidently, plagues most students in the CSU and UC system. Our (student) senators are no exception.

I will stress to everyone that you have not converted a man because you have silenced him. Mr. Sasway will not alter his views because of his sentence. Nor will OUR individual rights be any less severely maimed when our senators honorably detached themselves from this matter.

Benjamin Sasway has been imprisoned for his beliefs. He is a political

prisoner jailed for his beliefs, not for any crime he has committed against society or person.

A few senators have cried that it is not the place of the CSSA to take stands on social issues. I plead for this position to not be written in stone. Many of our world's problems are of such grave importance to all of us that to deny they exist is to deny we (as people) live in the real world. The denial of individual mores with the threat of sanctioned internment is such a problem.

I am hurt by the CSSA's actions, and fearful of their wish to suck us into a rose-filled vacuum.

Raymond Rowntree
